PARIS EXPOSITION, IN PARIS, FRANCE, IN 1900

BARTELDES SEED CORN

Large, plump, well-filled ears, and a big yield, which comes from a good, even stand, can only be secured when high-class seed is planted.

Seed corn must be carefully selected in the ear, properly dried, then tipped, butted, shelled and finally accurately tested for vitality. That is the kind you get from Barteldes.

Let us send you samples of the varieties in which you are most interested. We have varieties adapted to every condition, and we know we can please you.

Don't waste your time, land and labor by planting seed corn of doubtful quality, when you can get the Barteldes kind so easily. You will find prices on the Pink List.

LAWRENCE, KANSAS

DENVER, COLORADO

OKLAHOMA CITY, OKLA.

GLADIOLA
BULBS
FOR
SPRING PLANTING

One of the most popular among spring planting bulbs. These require but little attention and produce beautiful flowers at a time when flowers are somewhat scarce. The long, brightly colored spikes are fine for bouquets.

For further information see inside back cover of catalog.

Fine bulbs of mixed colors 50c per dozen. Postpaid.
THE BARTELDGES ALL-SEASON GARDEN
20 ft. x 20 ft.
Will produce a surprising quantity of fresh, crisp vegetables.

SOUTHPORT RED GLOBE ONION.
Page 33 of Catalog.
A large, beautifully colored globe shaped onion. It has a small neck, is a splendid keeper and of fine quality.
Plt. 5c, oz. 3c, 1/2-lb. 8c, lb. $2.75.

GOLDEN BANTAM SWEET CORN
You have missed a rare treat, if you have never eaten Golden Bantam sweet corn, fresh from the garden.

When it comes to tenderness and sweetness, Golden Bantam is ahead of any other variety. The ears are rather small and some people are prejudiced against it on account of the color. But no one who has once eaten one of these delicious ears ever will pass it up for any other.

Market gardeners can build up a fine trade by letting their customers try an ear or two of Golden Bantam.

Plt. 5c, lb. 25c, 2 lb. 45c, 10 lb. $2.00.
Postage extra.

THE BARTELDGES CATALOG FOR 1920
Our catalog is most complete and we believe is the best book issued in the West. It is full of valuable information about all kinds of crops and should be in the hands of every planter. If you did not receive this book or have misplaced your copy, let us send you another one.

FOLLOW THE ABOVE PLAN
This is planned to make a small plot—only 20 by 20 feet—produce to the limit, and you will be greatly surprised to learn how much you can get from it. The plan is to make the garden work throughout the season. Plant the varieties printed in black first, and when these are out of the way, follow them with those varieties printed in red. In this way, practically every part of the garden will yield two crops.

Three varieties printed in blue will be matured and removed before the companion crop requires much room.

BARTELDGES "ALL SEASON" COLLECTION

- 1 pkt. Radish, Crimson Giant Globe...$0.05
- 1 pkt. Lettuce, BarTedges Denver Market...05
- 1 lb. White Bottom Onion sets...20
- 1 lb. Red Bottom Onion sets...20
- 1 lb. Yellow Bottom Onion sets...20
- 1 pkt. Carrot, Oxheart...10

- 1 pkt. Lettuce, Big Boston...05
- 1 pkt. Radish, White Strasbourg...05

1 pkt. Radish, lecile...00
1 pkt. Carrot, Chantenay...05

Special Offer, Postpaid...$1.15

PAGE 6 OF THE CATALOG.
Copenhagen Market sprang into popular favor very quickly on account of the very short time in which it matured a large head. Since it is the early produce that brings the big prices, Copenhagen Market is a money-maker for the gardener.
Equally good for the home garden, as the large heads are very firm and of fine flavor.
Plt. 10c, oz. 25c, oz. 50c, lb. $1.50, Postpaid.

DANVERS HALF LONG CARROT.
Page 20 of Catalog.
One of the best for small garden and market garden. Yields wonderfully, is easily harvested, and of fine color.
Plt. 5c, oz. 10c, 1/2-lb. 30c, lb. $1.00. Postpaid.
BARTELDGES GREELEY WONDER MELON.

Page 5 of Catalog.

This melon is rightly named, as it is certainly a most wonderful melon. It was originated some years ago by an accidental cross between the Rockford and the Delmonico.

The result of this cross is a melon of large size, thick yellow tinged flesh of a most delicious flavor. We believe we have eaten about every melon on the market, but we have never tried any that has a flavor equal to the Greeley Wonder.

The delicious flavor combined with the large size makes this a truly wonderful melon, both for market and home consumption.

Our stock is very limited, so order early.
Packet 10c, oz. 30c, 1/4 lb. $1.00. Postpaid.

BARTELDGE DENVER MARKET LETTUCE.

Page 27 of Catalog.

The Denver Market was originated by a gardener in Denver about twenty years ago, and is rapidly became one of the best and most popular all purpose varieties of lettuce. It is early and good for both forcing and open ground planting. It forms large, solid heads of beautiful light green color. The leaves are beautifully marked and blistered, very crisp and tender, and of excellent flavor.

Buy this seed from us and get the pure stock.
Packet 5c, oz. 10c, 1/4 lb. 30c, lb. $1.00. Postpaid.

BARTELDGES NURSERY STOCK

High Quality Low Prices

The planting of trees, shrubs and other nursery stock has been rather difficult the past few years owing to the unsettled conditions and the scarcity of help.

You should not put this off another season. All fruits are bringing record prices, and you should replant that old orchard or set out that new one without delay.

Prices of Nursery Stock have advanced, but not in proportion to the prices of other commodities. Some nurseries who sell by agents are getting very high prices. They have to get these high prices, as this canvassing from house to house is very expensive.

We sell through our catalog or through reliable dealers, both very economical methods and we give you the benefit of the saving we make by not sending out salesmen to make a house to house canvass.

Another thing: When you buy from a canvasser or house to house salesman you do not know whether you are buying from a reliable nursery or from some fly-by-night concern that sends salesmen to one territory one season, and some other territory another season. But when you buy from Barteldes, you know just with whom you are dealing and you may rest assured that when you buy from a house over fifty years old, you are going to get a square deal.

You will find in our catalog a very complete assortment of all kinds of nursery stock, including fruit trees, shade trees, shrubs, ornamental plants and vines—all at low prices.

You will find it very convenient to send us your order for nursery stock and seeds in one order: but don't put this off. Order early, as Nursery stock is very scarce this season.

PERFECTION CURRANT.

A wonderful producer of large bright red berries that are fine for making jelly. If you have room for currant bushes, be sure you get a few of these.

45c each, 6 for $2.50, 12 for $4.50. Postpaid.

FREE
SEND THIS COUPON WITH YOUR ORDER AND WE WILL SEND YOU FREE ONE PACKET SWEET PEA SEED.
USE THE COUPON

ELBERTA PEACH.

The Elberta is the most satisfactory and the most popular peach on the market. It is a good bearer, stands shipping well, and is the most desirable all around peach.

See catalog for prices.

EVER-BEARING STRAWBERRIES.

Everbearing Strawberries have passed the experimental stage and have proved their worth. You can now have luscious strawberries in summer and fall just as easily as in the spring. Plants set out in the spring will bear fruit in the fall of the same season.

Postpaid, 12 for 50c, 50 for $1.50, 100 for $2.75. Postpaid.

SPIREA VAN HOUTEI—BRIDAL WREATH.

The most satisfactory of all flowering shrubs. Plants set about six feet apart, make a beautiful hedge and individual specimens are of rare beauty, literally covered with white flowers early in the spring.

Price, 60c each. Postpaid.
BARTELDES

ALFALFA

YEAR IN AND YEAR OUT THE MOST PROFITABLE CROP ON THE FARM.

We know of no crop that will keep on paying big profits, year after year, as will Alfalfa. It takes but one seeding, requires no cultivation, and yields big crops of high quality hay, and in a dry season a very profitable seed crop.

The real value of Alfalfa is shown by the records of the Kansas crops for the year of 1918. The value of Alfalfa per acre was $47.00, as compared to $15.00 per acre for corn, $18.00 per acre for Winter Wheat, and $13.00 per acre for Sudan Grass.

Since an Alfalfa field will last from 6 to 12 years, it is important that every effort be made to secure the best possible stand. The seed bed should be carefully and thoroughly prepared and above all, the quality of the seed sown should be the highest. The seed should be pure, of good germination, and free of weed seeds.

We have been handling Alfalfa seed since 1875—being the pioneer alfalfa seed dealers in the Middle West—and our experience of 45 years has taught us to know good alfalfa seed. We have had some of our own study seed testing in the Government Laboratory, we analyze every lot carefully to see whether or not it contains bad weeds; we have the most improved seed cleaning machinery, and when you buy Barteldes best grade you can be assured you are getting the very best seed on the market.

The crop of Alfalfa seed was very short this season, and real good seed was especially scarce. We have had our buyers in all the seed-producing sections, often following the threshers from job to job. In this way, we secured a fair stock of high quality Alfalfa seed, which we now offer as long as our supplies last.

In order to give Alfalfa the best chances for success, and in order to get the biggest crops of hay, use Barteldes Inoculator when sowing the seed.

INOCULATE
ALFALFA
AND
SWEET CLOVER
WITH
BARTELDES
INOCULATOR

Sweet Clover has been growing on our hillsides, along the roads, and other waste places for years, but it was thought to be of no value, and nobody paid much attention to it. A few years ago it was discovered that Sweet Clover made very good hay and excellent pasturage and it quickly sprang into popularity.

Now Sweet Clover has a very important place in agriculture. While Sweet Clover has a rather bitter taste, animals can be taught to take it. A little lime sprinkled on the hay will induce them to eat it quite readily. An acre of Sweet Clover will furnish pasturage through the season for about 20 young hogs, which apparently thrive quite as well as on Alfalfa or Red Clover. In pasturing cattle care must be taken to avoid bloating.

The best feature of Sweet Clover is its ability to thrive on very poor soils. It will grow on practically all types of soil—from cemented clays to loose gravel and poor sand. Also, being a legume, it will, if inoculated, improve the soil on which it is growing. Therefore, sow Sweet Clover on poor soil and it will soon be fit for other crops.

BARTELDES SWEET CLOVER.
A RICH CROP FOR POOR SOILS.

BARTELDES FIELD SEEDS.

Our long experience, our buying power due to our size, our vast territory that brings in quality seed, our low costs of production, our ability to pay cash, etc., all enable us to supply you with the very best in all field seeds at lowest possible prices.

Bar tel des Pink List

Some seed dealers print field seed prices in their catalogs and others issue a monthly price list. In order to give you the benefit of lowest prices, we issue our Pink List every few days. In printing prices good for a season, they must be made quite high to allow for advances in the market during the season. In printing a monthly price list, it is necessary to make prices high enough to allow for possible advances in the market during the month. By printing our Pink List every few days, we can quote you the exact market prices, as we know that we can issue a new list to take care of market advances. You will, therefore, find that our Pink List prices will always be very low for high quality seeds.

We will gladly send you this list any time you ask for it.
